Work Experience

AcuityAI Stanford Startup

Palo Alto, CA

COMPUTER VISION AND MACHINE LEARNING INTERN

June 2018 - PRESENT

- Improved image detection accuracy by hyper-parameter optimization on different models like ResNet, VGG, MobileNet, Inception, etc. and modifying existing layers/models as per the use case;
- Extracted, transformed and cleaned large dataset on Linux based cloud machines to train AI models;
- Did supervised learning with feature extraction and principal component analysis for feature reduction;

San Jose State University

San Jose, CA

RESEARCH ASSISTANT

Jan. 2018 - PRESENT

- Built, validated and tested various Machine Learning models to classify Hepatic Drug Transporters as Inhibitors or Non-Inhibitors;
- Converted unstructured data to a structured format using Natural Language Processing and exposed it using MEAN Stack on Google Cloud
- Awarded funds by the SJSU College of Science Research, Scholarship, and Creative Activity (RSCA) grant;

Deloitte Consulting LLP

Mumbai, India

BUSINESS TECHNOLOGY ANALYST (DELOITTE DIGITAL)

Nov. 2015 - Aug. 2017

- Evaluated as a top performer for implementing multiple business modules in Java, overcoming obstacles, and ensuring timely delivery working under an agile development model;
- Helped in architectural design of large-scale projects considering trade offs and effectively communicating across the team and the client;
- Created a distributed data processing engine using Apache Storm and Apache Kafka, as a Firm initiative to be proposed to a prospective client;

Accenture Services Pvt. Ltd

Hyderabad, India

SOFTWARE ENGINEER

Aug. 2013 - Oct. 2015

- Designed and developed multiple use cases in Java along with their jUnits satisfying user requirements ;
- Created a XML based automated testing framework, to test REST services, saving around 40% of the previous testing effort;
- Awarded ACE(Accenture Celebrates Excellence) award for effective team-work and successfully delivering a high risk project;

City Synapse Info Pvt. Ltd. (Internship)

Bangalore, India

WEB DEVELOPER INTERN

Jan. 2012 - July. 2012

- Maintained the website realtykart.com; adding/editing webpages using full stack(LAMP), managing domains and hosting;
- Used google apps, AdWords, Designed and edited digital banners/images using Photoshop, gimp, etc.;

Academic Projects

Obstacle Detection to help Visually Impaired (GuideApp - Android Application)

San Jose, CA

ANDROID SDK, TENSORFLOW LITE, PYTHON

Dec. 2017

- Created an application to alert visually impaired by detecting obstacles on the street;
- Trained MobileNet model with self curated images to get an accuracy of 93%;

Automated Solar Panel installation layout generation using Object + Edge detection

San Jose, CA

TENSORFLOW (MOBILENET), PYTHON, EDGE DETECTION ALGORITHM

Feb. 2018

- Detected obstacles on roof, followed by edge detection on each of the detected bounding boxes, to get the obstacle boundaries;
- Compared and contrasted results from different algorithms;

Distributed Patient Information System Web API

JAVA, ACTIVE MQ, CASSANDRA DB, HAZELCAST CACHING, SPRING BOOT

- Built a REST-ful Web API using a distributed system architecture hosted on multiple AWS instances(PaaS);

San Jose, CA

Oct. 2017

Visualization using Data Sonification and NLP for e-book comprehension using NLTK

PYTHON, NLTK, JYTHON, GENETIC ALGORITHM, BOOTSTRAP

- Used Jython music to sonify changes in California's temperature over last 80 years;
- POS tagged web scrapped e-books, extracted and visualized relationships between entities(characters and locations);
- Used genetic algorithm to auto-create a bootstrap based website using characters, locations and events from the book;

San Jose, CA

Sept. 2017

Image Classification, Clustering and Mutation

PYTHON, K-MEANS CLUSTERING, HIERARCHICAL CLUSTERING, GENETIC ALGORITHM

- Classified and Clustered images using k-NN, K-Means and single link hierarchical clustering algorithm;
- Performed three fold cross-validation, analyzed and plotted accuracy vs K graph;
- Used genetic algorithm to mutate a source image into a destination image;

San Jose, CA

Sept. 2017

Data Visualization Web Apps

MONGO DB, EXPRESS JS, ANGULAR JS, NODE JS, D3.JS

- Visualized around 5GB of publicly available Obama government's social media data including images, videos and audios on a chronological time-line based interface;
- Visualized California's college's admission data as a force directed graphs, for all academic year's from the year 2003 to 2016;
